

I just began my subscription to XM Satellite radio because I like the XM Instant Traffic & Weather. The satellite radio station does provide variety and quality that I can't get on any other FM or AM stations. I also appreciate not having commercials. I am paying for this service and I don't believe the National Association of Broadcasters has any right to dictate to me what I can or cannot hear on satellite radio. Please reject the NAB's petition 04-160.
